**scott@utahtopsoil.com**

### **Blend Components:**

100% 3/8" to 1/2" graded lightweight expanded shale or volcanic aggregates

### **Properties:**

- Bulk density: 45 – 52 lbs/cf
- Saturated bulk density: 65 – 80 lbs/cf
- Air filled porosity: >10%
- Water permeability rate: >30 in/hr.

### **Application:**

Granular drainage layer in green roof and rooftop garden systems. Lightweight drain rock for filling voids or backfilling around foundation walls or buried sensitive elements.
